

SHYAM BHARASKAR

Backend Developer | Java | Spring Boot

☎ 8485875223 | ✉ sbharaskar8485@gmail.com
📍 Pune | 🐙 GitHub | 🔗 LinkedIn | 🌐 Portfolio

Professional Summary

Backend-focused Computer Engineering graduate skilled in **Java, Spring Boot, Spring Security, REST APIs, JWT authentication, and relational database design**. Built backend systems involving **15+ REST APIs, role-based access control, API rate limiting, microservice architecture, and RAG-based document Q&A**. Hands-on experience with **MySQL, PostgreSQL, MongoDB, React.js, and FastAPI**, with a focus on secure APIs, backend architecture, and production-oriented application development.

Technical Skills

Languages: Java, Python, C, C++, JavaScript

Backend: Spring Boot, Spring Security, REST APIs, JWT, FastAPI, Microservices

Frontend: React.js, HTML, CSS, Tailwind CSS

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, Swagger, Maven, Vercel

Projects

JIRA-Style Task Management System | Spring Boot, React.js, MySQL

🐙 GitHub

- Developed a **microservice-based task management platform** using Spring Boot, React.js, and MySQL for project and workflow management.
- Designed and integrated **15+ REST APIs** covering authentication, project workflows, task assignment, status tracking, and collaboration.
- Implemented **JWT authentication and role-based access control** to secure protected APIs and enforce user permissions.
- Designed relational database mappings for users, projects, tasks, members, and workflow relationships.

RAG-Based Document Q&A System | Spring Boot, React.js, FastAPI

🐙 GitHub

- Built an AI-powered document Q&A platform using **Retrieval-Augmented Generation (RAG)** for contextual question answering.
- Implemented document processing with **text chunking, embedding generation, and vector similarity search** for semantic retrieval.
- Developed backend APIs for document queries, authentication, and conversation history using Spring Boot and FastAPI.
- Improved response relevance by retrieving semantically similar document chunks before generating contextual answers.

Role-Based Access Control System | Spring Boot, Java, React.js

🐙 GitHub

- Developed a secure authentication and authorization system using **Spring Security, JWT, and MySQL**.
- Implemented administrative management for users, roles, and permission assignments.
- Secured protected REST endpoints using **token-based authorization and role-based access policies**.
- Designed an extensible authorization architecture supporting multiple roles and granular permissions.

Distributed Rate Limiter API | Spring Boot, Java

🐙 GitHub

- Built a Spring Boot API rate limiting service to control excessive client requests and prevent API abuse.
- Implemented **fixed-window request throttling** with per-user and per-endpoint request control.
- Developed interceptor-based request filtering to enforce rate limits before requests reached protected application endpoints.

Experience

Frontend Developer Intern

Omega Soft

- Developed responsive interfaces for a **Housing Management System** using HTML, CSS, JavaScript, and React.js.
- Implemented modules for **property listings, tenant management, and rent tracking dashboards**.
- Built dynamic client-side functionality for form handling, data interaction, and responsive user workflows.
- Collaborated with backend developers to integrate APIs and maintain reliable application data flow across frontend modules.

Education

Bachelor's Degree in Computer Engineering
MES Wadia College, Pune

2022 – 2026
CGPA: 8.17
